

INNOVATIVE CONSTRUCTION

methods and examples

Karen Manley

Leader, BRITE Project, CRC for Construction
Innovation

innovation and new business relationships

A bundle of fiber optic cables is shown against a black background. The cables are illuminated from the top, creating a bright, glowing effect. The light trails from the cables are blurred, creating a sense of motion and depth. The colors range from bright white and yellow at the top to deep blue and green at the bottom.

competency 1:
relationships
with employees

An aerial photograph of a large dam and reservoir. The reservoir is a deep blue color, surrounded by lush green hills and mountains. The dam is a long, curved structure made of concrete or stone, extending across the width of the reservoir. In the foreground, there are some buildings and a road near the dam. The background shows more mountains and a clear sky.

competency 2:
relationships
with clients

Competent clients:

- undertake research and development (R&D)
- network with specialist experts
- set challenging project requirements
- offer value-driven tender selection
- participate in technology demonstration programs
- encourage alternative tenders
- design of new forms of contract
- prioritise relationship management on projects

competency 3:
relationships with the
project team

competency 4:
relationships
with
knowledge
providers

competency 5: relationships with government
