

Construction Innovation to take centre stage

Construction industry researchers and experts from around the world will converge on Queensland's Gold Coast from 12 to 14 March, 2006, for 'Clients Driving Innovation', *Construction Innovation's* second international conference.

Delegates at the three-day conference will hear case study after case study from the many Australian and international speakers spelling out the benefits, methods and motivations of clients who have driven innovation in construction.

From the CEO's Desk

For those unfamiliar with the work of the CRC for *Construction Innovation*, our 'Clients Driving Innovation: Moving Ideas into Practice' conference is just one example of the diffusion of innovative ideas and world's best practice we are helping to bring to the Australian property, design, construction and facility management industry.

The three-day conference on Queensland's Gold Coast features some of the most experienced and talented people from across all sectors of our industry.
