

## DesignCheck wins AIB (NSW) R&D award

DesignCheck has won the research and development category at the Australian Institute of Building (AIB) 2006 New South Wales Professional Excellence in Building Awards.

Project team leader, Dr Lan Ding, from CSIRO, accepted the award on behalf of the whole *Construction Innovation* team in Sydney on Friday, 7 July. [More Details](#)

## Your Building project gathers momentum

Project team leader Tony Stapledon and the Your Building team are busy getting on with the job.

The Your Building project now has a logo, user focus groups have just been held in Sydney and Melbourne and the site's initial web presence is just weeks away from going 'live'. [More Details](#)

## Scholar's corner: Garry Creedy hits the road

Congratulations to *Construction Innovation* scholar Garry Creedy, who has finished his doctoral thesis and has returned to the Queensland Department of Main Roads after three years' research. [More Details](#)

## Adopting eBusiness introductory guide

*Construction Innovation* has created an introductory guide to eBusiness for small businesses in the building and construction industry. [More Details](#)

## From the CEO's Desk

*Construction Innovation* is five years old. A significant milestone, yes, but not one we marked with any great celebration. It might sound cliché but, like much of the construction industry at the moment, we're busy.

We've been given a seven year life by the Australian Government's Cooperative Research Centres (CRC) Programme and, with less than two years to run, we've reached a crescendo of sorts. Working with our private and public industry partners, our researchers are working on more than 30 projects at the moment.

Several projects have ended recently and the results are currently being disseminated to industry...[More Details](#)
