## From the CEO's desk

www.construction-innovation.info

At a time when the Australian building and construction market is vibrant, industry may regard innovation somewhat reluctantly.

After all, why focus on improving your performance when work is plentiful?

However, innovation is the main driver for increased business profits and improved project outcomes. Without innovation, your business will not be around in the long term and, in the short term innovation is the only way to improve tight profit margins.

Innovation is about trying something new, that is, implementing new technologies and new practices in order to improve productivity or other project outcomes related to safety, quality and the environment for example. It does not have to be world-first innovation – simply moving from a business-as-usual mode of operating to adopting best practice, or even better practice, is innovative. <u>More details</u>
